From Disaster Awareness to Action: Exploring the Achievements of WP4

WP4 of the VET-READY project focused on strengthening disaster awareness and life-saving skills through practical training, innovative digital learning, and international cooperation.

RESULTS

Learn more

Key activities included the AFAD Real Situation Lab in Türkiye, the development of the multilingual Online Knowledge Hub and its interactive learning tools, pilot testing across six countries, the international "Adapting VET-READY" webinar, and the Final Transnational Project Meeting in Granada. Together, these activities promoted accessible, inclusive, and practical disaster preparedness education across Europe.

Learning from Real-Life Emergency Operations in Türkiye - *9–11 December 2025 | Denizli, Türkiye*

One of the key highlights of WP4 was the "Real Situation Lab" LTTA, hosted by AFAD in Denizli, Türkiye, on 9–11 December 2025.

VET-READY partners observed and participated in a large-scale emergency response exercise, including earthquake simulations, search and rescue operations, emergency coordination, mountain and canyon rescues supported by drones, and water rescue demonstrations.

These practical experiences provided valuable insights into disaster preparedness and emergency response. Alongside the training, partners held a Transnational Project Meeting to discuss progress across WP2, WP3 and WP4. The programme also included a cultural visit to Pamukkale.

Bringing the VET-READY Online Knowledge Hub to Life

Following the training activities, WP4 focused on the development of the VET-READY Online Knowledge Hub, coordinated by iED. The multilingual platform provides dedicated learning spaces for educators and learners, featuring:

- 30 online courses on disaster awareness and life-saving skills.
- 180 interactive quizzes and Pause and Reflect activities.
- Interactive Emergency Kit Assembly Guide with 12 video-based scenarios.
- Interactive Family Plan Generator for personalised emergency preparedness.
- Life-Saving Skills Self-Assessment for scenario-based learning.

Online Knowledge Hub

Testing and Improving the Learning Experience

Following the development phase, the VET-READY Online Knowledge Hub underwent pilot testing in six countries.

The pilot activities provided an opportunity to evaluate the platform's usability, accessibility, content and overall learning experience.

Feedback from participants and project partners supported technical checks, content revisions and improvements to the learning environment, helping ensure that the platform responds to the needs of educators and adult learners.

A Successful International Webinar: Adapting VET-READY - *21 September 2026 | Online*

The VET-READY consortium successfully organised the international webinar "Adapting VET-READY", bringing together educators, trainers, stakeholders and individuals interested in disaster preparedness and innovative learning.
Webinar at a glance:

- 356 registrations
- 140+ concurrent participants
- 7 languages
- 6 national breakout rooms
- 4+ hours of learning, exchange and engagement

Participants explored the VET-READY curriculum, the Online Knowledge Hub, interactive project resources and findings related to disaster awareness.

Final Transnational Project Meeting in Granada, Spain

28–29 September 2026 | Granada, Spain

Hosted by Neotalentway, the Final Transnational Project Meeting brought together partners from Spain, Latvia, Türkiye, Cyprus, Iceland and Ukraine to evaluate project achievements and coordinate the remaining activities.
Particular attention was given to the VET-READY Online Knowledge Hub, user engagement, certificates, platform quality, final technical improvements and the results of the international webinar.
Partners also discussed the sustainability of the project, focusing on how its digital resources and educational outcomes can continue to support trainers, educators and learners beyond the project lifetime.

Co-funded by the European Union

Neither the European Union nor the granting authority can be held responsible for them.

Next Steps

WP4 has created an important foundation for more accessible, interactive and inclusive disaster awareness education.
The VET-READY Online Knowledge Hub offers resources that educators and learners can use to strengthen their knowledge, practise decision-making and develop essential preparedness skills.
By encouraging active learning, practical preparedness and community resilience, VET-READY continues to support safer and better-informed communities.
